

FWX Aviation - Product Fact Sheet

Helicopter add-ons for Microsoft Flight Simulator 2024 · version 2.0.8 · 7 September 2026

Products

Name	Version	Price (EUR)	What it does
FWX EC135 Turbine Sound Enhancement Mod	2.0.8	7.99	Recorded turbine sound in place of the standard one, in the cockpit and from outside, for the Nemeth Design EC135.
FWX EC135 Haptic - Bass Shaker Mod	2.0.8	7.99	Rotor haptics for every helicopter in the simulator: you feel each blade pass through your seat or your controls. A bass shaker or tactile transducer is required.
FWX EC135 Sound + Haptic Bundle	2.0.8	14.99	Both products above in one purchase, with separate uninstall for each part.
FWX Helicopter Flight Dynamics	2.0.8	see SimMarket	A livelier helicopter, worked out live from the simulator's own aerodynamic data, with a saved profile for every helicopter type.
FWX Helicopter Rotor Shadow Mod	2.0.8	see SimMarket	The rotor shadow the simulator does not draw: on the ground, on the fuselage and on everything below you. Seven helicopter types.
Further bundles	2.0.8	see SimMarket	The products above are also offered in several combinations, including an all-in-one package.

All settings are made inside the simulator, in the FWX Control Center panel.

Platform and requirements

- Microsoft Flight Simulator 2024 (PC) – Microsoft Store and Steam editions. MSFS 2020 is not supported.
- Windows 11. Not available on Xbox.
- The Turbine Sound Enhancement Mod requires the Nemeth Design EC135 (Local Legend 21), included free with the simulator.
- The Haptic Mod requires a bass shaker, tactile transducer or comparable device on a separate audio output.

Where to buy

- SimMarket: <https://secure.simmarket.com/fwxaviation.mhtml>
- Own website: <https://finnwestx1.com> – instant download after purchase.

One-time payment, no subscription. 30-day technical refund for confirmed technical issues, in addition to the statutory right of withdrawal under German law. Free version upgrades for existing customers.
